## **Exercise 2:**

### **Create the Digital marketing webpage**

For Digital Marketing or E-Commerce, a website is the virtual store from where the commercial transaction of buying and selling takes place. The Website gives information about the products and services; the price tag associated with various products and services and provides a mechanism to acquire the products and services through electronic exchange of money. A webstore created for E-Commerce needs to have the following components:

1. Home Page that contains information about products and services
2. About Page that contains detailed description about the company
3. Contact Us Page where the Contact Number, Fax Number, Email, Twitter and Facebook contact details all are given.
4. Payment Gateway to make payments through Debit Card or Credit Cards.
5. SSL (Secure Socket Layer) Certificate. SSL Certificates provide secure, encrypted communications between a website and an internet browser.

Like people differ from each other, a webstore layout can also differ according to the need of target users and creativity of the web designer. However, a content heavy website with rich graphics will take a long time in loading. A simple website might not be able to catch the attention. This where the rules of optimization become important to create a website that is pleasing to the eye and also loads faster than the average ones.

The students are expected to perform the following tasks to create the promotional web page

1. Go to GoDaddy and analyse the different kind of domain names offered there.
2. Go to GoDaddy and analyse the different kind of hosting options offered there.
3. Go to Wix.com and create a promotional web page in a shared hosting service

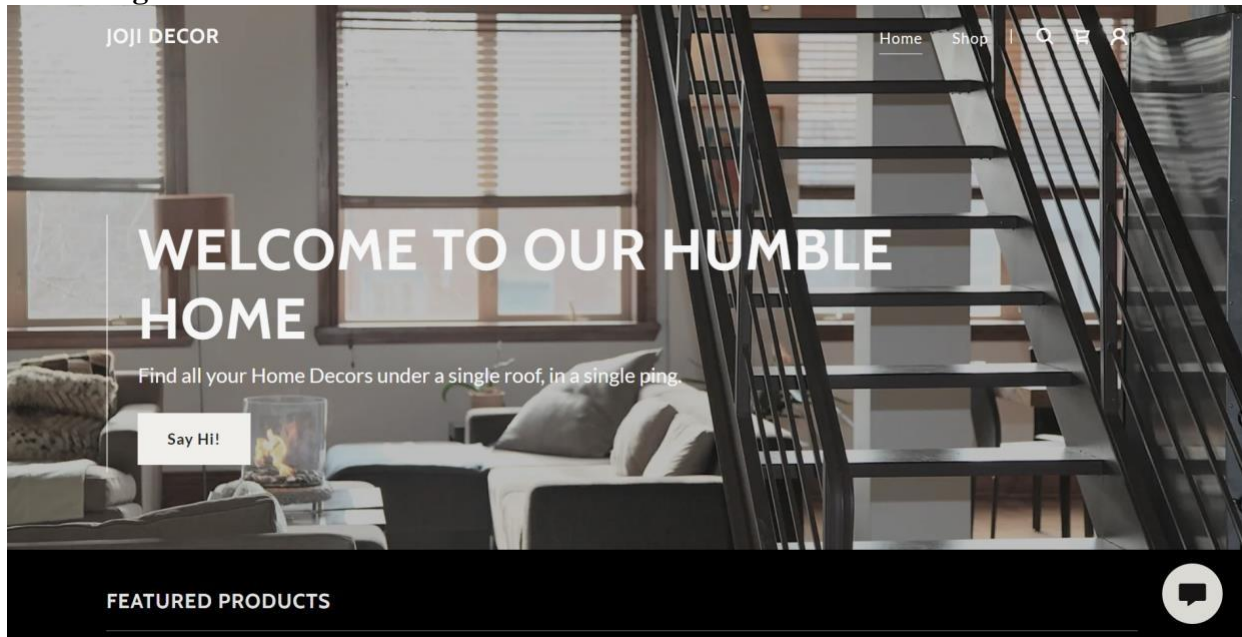

Wix.com is a website builder that allows you to build a website with no coding. Wix is free to start but to set up a shop, remove branding, connect a custom domain, and more, you must select one of the affordable premium plans.

4. Customize the Website using various options given by Wix
5. Publish the website online
6. Find the ranking of your website using Alexa.com

#### **Creating Promotional banners through Canva**

Canva is a simplified graphic-design tool, founded in 2012. It uses a drag-and-drop format and provides access to photographs, vector images, graphics, and fonts. It is used by non-designers as well as professionals. The tools can be used for both web and print media design.

#### **Tasks:**

1. Go to Canva.com
2. Create a new Canva account to get started with your banner.
3. Choose from the library, hundreds of professionally designed templates.
4. Upload your own photos or choose from over 1 million stock images.
5. Fix your pictures, add stunning filters and edit text.
6. Save and share.
7. Create a series of banners with different themes with Canva to promote your product.
8. You have to incorporate the banners in your website and also use them for Facebook, Instagram and Twitter Marketing

## Exercise :4

### Conducting the Search Engine Optimization and Search Engine Marketing

To do the Search Engine Optimization, the basic task is to insert keywords in the Website.

The right keywords can be determined by using a tool called Keyword Planner which is a free tool offered by Google.

Step 1: Go to Google AdWords Keyword Planner

Step 2: Find Your Topic

Step 3: Get Keyword Ideas

Step 4: Pick the Perfect Keyword

Step 5: Incorporate the Keywords in your website at Wix.com

The screenshot displays the 'Settings for Main Pages' interface in Wix's SEO Tools. The top section lists four main settings: 'SEO basics & social share', 'Structured data markup', 'Robots meta tag', and 'Additional meta tags', each with an 'Edit' button. The 'Additional meta tags' section is expanded, showing a list of meta tags with their corresponding variable names and values. A 'New Tag' dialog box is open, showing the configuration for a new meta tag named 'keywords'.

SEO Tools > SEO Settings > Settings for Main Pages

### Settings for Main Pages

Set the default settings & meta tags for main pages not already customized for SEO. [What are defaults?](#) [Need Help?](#)

- SEO basics & social share**  
Choose how search engines & social networks display your main site pages. [Learn more](#) [Edit](#)
- Structured data markup**  
Manage the markup on your main site pages. [Learn more](#) [Edit](#)
- Robots meta tag**  
Select the relevant instructions, so bots know what info to display after crawling your main site pages. [Learn more](#) [Edit](#)
- Additional meta tags**  
Review additional info about your main site pages for search engines (editing recommended for experts only). [Learn more](#) [Edit](#)

SEO Tools > SEO Settings > Settings for Main Pages [Need Help?](#)

#### Additional meta tags

Review additional info about your main site pages for search engines (editing recommended for experts only). [Learn more](#) [Discard Changes](#) [Save](#)

| Meta Tag      | Variable  | Value | Action         |
|---------------|-----------|-------|----------------|
| canonical     | Page URL  |       | + Add Variable |
| og:site_name  | Site Name |       | + Add Variable |
| og:type       | website   |       | + Add Variable |
| og:url        | Page URL  |       | + Add Variable |
| + Add New Tag |           |       |                |

#### New Tag

<meta name="keywords"  
content="keyword1, keyword2,  
keyword3"/>

+ Add Variable

When you click 'Save', the changes will be applied to all pages, but it will remain on individual pages [Discard Changes](#) [Save](#)

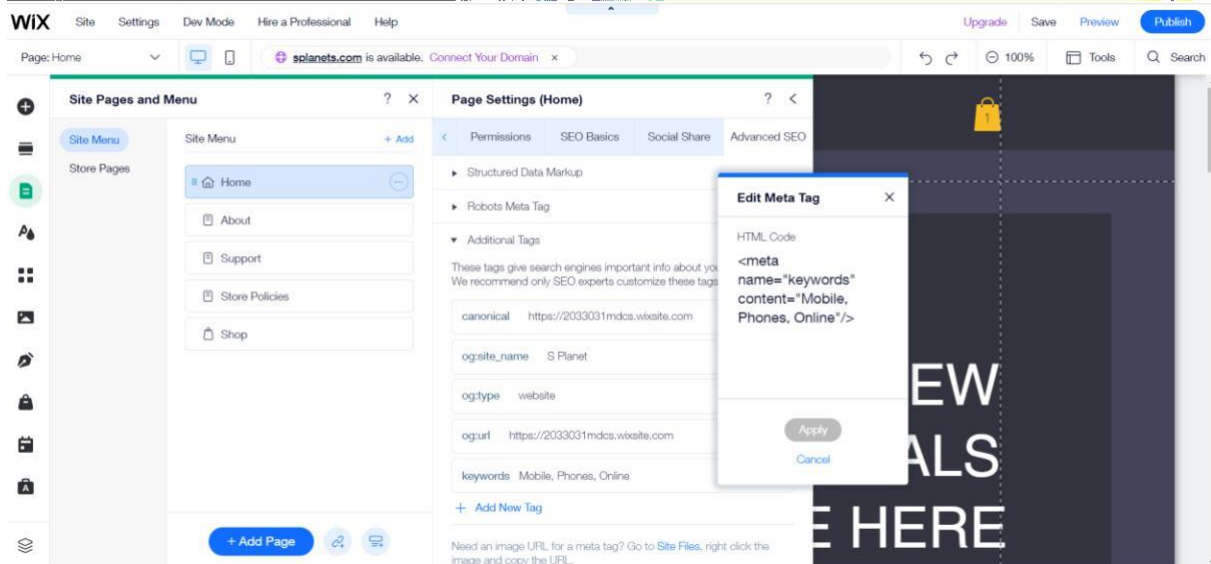

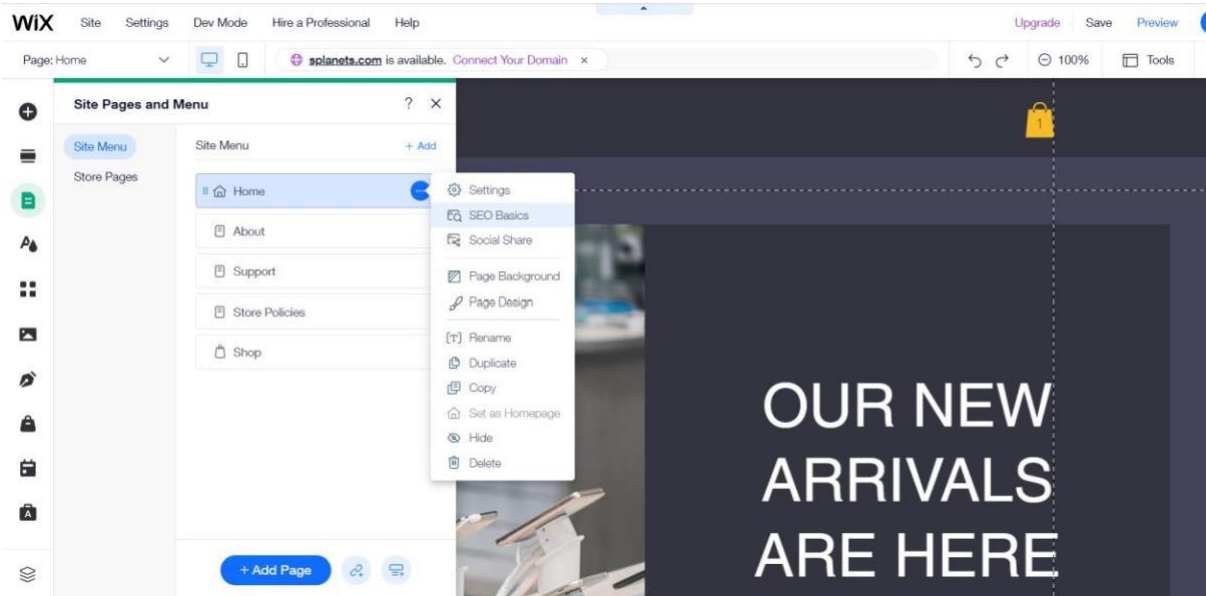

keywords

+ Add Variable

keyword1, keyword2, keyword3

+ Add New Tag

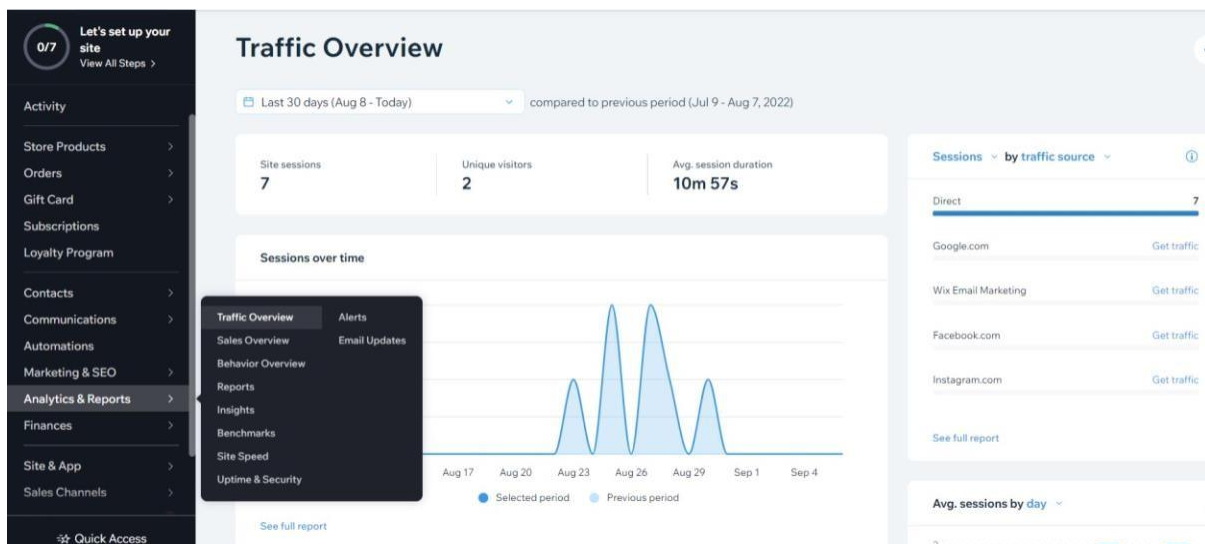

## Exercise: 5

### Using Google Analytics to analyse website performance

Tasks to be performed

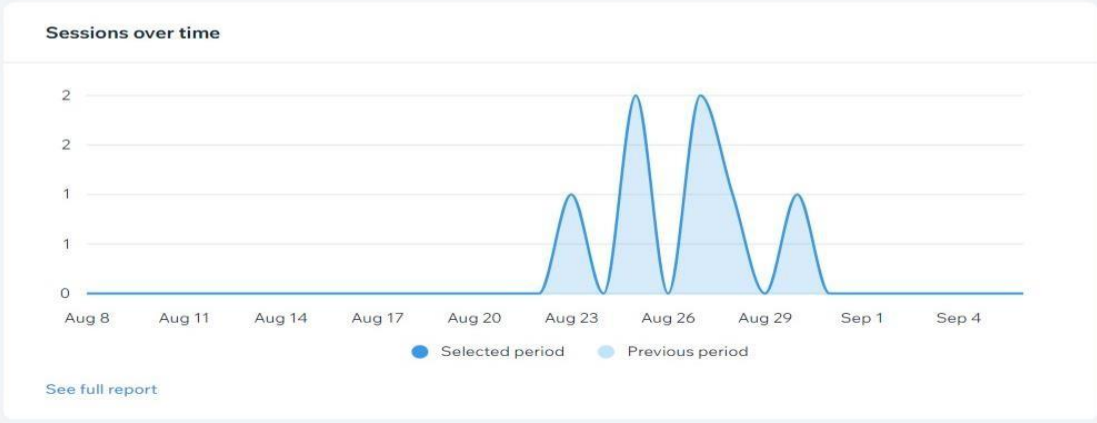

1. Set up the account and property
2. Install tracking code in the website at Wix.com
3. Generate reports through Google Analytics
4. Generate the Google Analytics Report using the mentioned parameters.
5. Comment upon the performance of your website at Wix.com using the Google Analytics Report

# Traffic Overview

## Benchmarks

Find out how you're doing compared to sites like yours.

### Not enough data yet

You'll see benchmarks once you have 30 monthly visitors. Use marketing tools to drive traffic to your site.

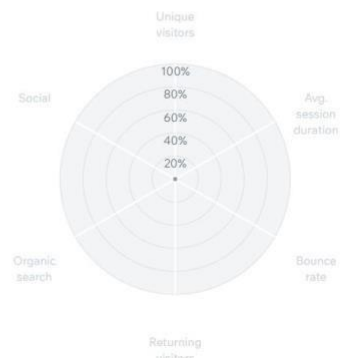

[Learn More](#)

| Traffic               | Your stats  | Better than |
|-----------------------|-------------|-------------|
| Unique visitors       | 2           | Unknown     |
| Avg. session duration | 10min 57sec | Unknown     |
| Bounce rate           | 57%         | Unknown     |
| Returning visitors    | 0%          | Unknown     |
| Organic search        | 0%          | Unknown     |
| Social                | 0%          | Unknown     |

Stats are relevant for the last 30 days: Aug 8 - Sep 6

### Competition radar

This is a visual representation of your benchmarks. The more coverage you have, the better you're doing compared to others.
